Subject: Fw: Dimock Residential GW Site - Supplemental Report for All Work Orders - Lithium Re-Analysis Results

Good Morning -

When you guys get back up to the CP and settled in would you please check on the status of Deb's review of the supplemental report for the re-analysis for the lithium (see attached e-mail). The original RL for lithium was 200 ug/L - all samples were re-run at a RL of 25 ug/L. If the results are final - I think that we would like to try to get them into the data reports for the week 2 data roll-out. However - I need to confirm this with Rich. At this time - I just want you to look into the status of the project review.

Thanks - Kelley

Subject: Dimock Residential GW Site - Supplemental Report for All Work Orders - Lithium Re-Analysis Results

This e-mail serves as notification that the Office of Analytical Services and Quality Assurance (OASQA) Laboratory has issued a supplemental report for the Final Results for Lithium. This supplemental report affects all Work Orders issued to date for this project. Please refer to the attached memo for specifics.
